

Staff Meeting: May 2, 2008

Location: Kennewick Office

Attendees: Don Warf, Darren Chase, Troy Humphrey, Scott Livingston & Jenn Nighbor

Absent: Alan Brower

Recorded by: Jenn Nighbor

Agenda Items:

- **Sites**

Bonneville

Troy to do GMCs at Bonneville on Monday.

BO1 – Slots look low in efficiency today. Big run going through.

Fish are still going right and flipper should have taken care of that. 57/1500 times fish went the wrong way.

Transceiver 03 making lots of noise, while the others were fine.

BO4 – Distribution box corroded. Water in the box as there is nowhere for condensation to go. Terminal blocks are rusted. Has been bad since it was put in.

Put in drain hole and silicone around side conduits during next GMC.

BCC – Noise is flat and hits per tag are going up.

McNary

Troy threw sticks on A & B. SbyC gates on, air on, all looks good.

MC1 – Noise still there. Quiet when Troy was there yesterday. Noise spikes between 12-3 pm.

Prosser

Can get rid of second tunnel. Scott finished that yesterday.

Removed second tunnel from ALL sties next week.

Scott to do Acc. Ponds next week while there.

Lower Monumental

Starting to take a dive.

Little Goose

A gate down to 90%. All by catch. Remotely tighten it up. Start collection on the 9th.

Suspend sticks due to high volume of fish moving through.

Sensor 2 stuck on last week. Taped up where I could. Put in time trap to see if there is a pattern.

East Raceway Diversion gate down to 71%. Water flow is too unpredictable.

Power is still on backup. Had an accident, Electrician hurt by an arc flash.

Independent electrician coming out May 7th and power may be up on May 8th.

Ice Harbor

New badges are ready and need to talk to Tom Wallace.

John Day – Chair missing.

Other News:

Wiki Pages – Site back burner issues. Change font color when items fixed.

Inventory – Always up to date.

Jenn to write SOP.

Ground Rules for Asset Tags

1. New Equipment coming in the door.
2. What is Asset Tagged?
 - a. High \$\$ Value
 - b. Easily walked away
 - c. All computers and monitors
 - d. \$ 500
 - e. PLC cans to be tagged (Hoffman Enclosures)
 - f. 4-20 ma cards – BCC & Wheel
 - g. Control Logix

- Contact Biomark
 - Wells (Antro Cart & 2 Computers)
 - Rocky Reach (nothing ?)
 - Priest Rapids (nothing ?)
 - Rapid River

- Question for Renee
 - APTTs & ARRT, tagged individually or as one unit?

- Jenn to work with Scott on SMOLT Account.

- Non-asset tag inventory meeting to be held.

- Jenn to construct sentence for Pitevent to use for asset movement tracking.

- Sandy D. has one of our P5-166 computers.

- Question
 - What do we do with tags once decision is may be PM or BPA to dispose of item?

Meeting adjourned to begin Safety Meeting.
